WORK ON PROGRESS

Klemens Haselsteiner

STRABAG
WORK ON PROGRESS

First 3D-printed building in Austria

One of the largest 3D printers in the world

Technology and training to combat the skilled labour shortage

- Construction 3D printing offers **significantly more design freedom** compared to classic concrete construction.
- Works for the building in Hausleiten were **completed in around 45 hours** of pure printing time.
- Up to **1 m/s printing time**.

Breaking new ground in power generation

information

Carbon Emissions

Energy from the quarry, for the quarry

- **500 t** of rock **generate** up to **550 kW** **electrical output** per hour.
- **Around 20 %** of its electricity needs itself, is **generated directly on site** to operate the processing plant.
- Thanks to a sustainable partnership with ÖBB Rail Cargo, **around 520 t of CO₂** **can be avoided** on a delivery volume of 30,000 t of material a year.

Focus on alternative materials

Sustainable Construction

The use of low-carbon concrete in practice

- Our new **Innovation Center** corporate offices in Stuttgart marked the first time that **we exclusively used low-carbon concrete**.
- The result: **Reduction** of carbon emissions **by 1,050 tonnes**. This saving equals to 12.9 million km with the current VW Golf Variant (2.0 TDI SCR). That's a **distance of 252 times around the world** or **26 times to the moon**.
- Corresponds to **savings of over 50 %** during the structural works.

Conserving fossil resources

Asphalt recycling

Technology with enormous potential

- Around **385,000 t of recycled asphalt** are used annually in **Austria** alone.
- **Austria's most modern asphalt mixing plant** produces asphalt mixes consisting of **up to 50 % of recycled material** – and even **up to 70 %** for some types of asphalt¹⁾.

1. Removal of old asphalt	2. Transport offsite
3. Reprocessing and admixture in asphalt mixing plant	4. Construction of new road

1) Technically enables a recycling rate of 100%

Circular economy business park

Circular Construction & Technology Center

Everything at one location

- Pioneering usage concept: **technology and research location** with co-working space.
- Use of **renewable energies**.
